PRESIDENT'S STATEMENT

Traction recorded a small loss in the second quarter, explained by stock market declines in some of the active holdings and revaluations of the unlisted holdings. Following the unexpected result of the referendum in United Kingdom, where the majority voted for leaving EU, the value of the holding mainly in the Waterman Group has dropped sharply. Some of Traction's other active holdings also showed a weak development in an overall weak stock market. On the other hand, the change in value of Traction's listed holdings since 30 June amounts to MSEK 49.

Traction's financial investments and interest-bearing instruments show a positive development for the quarter, as well as for the first six months of the year. The return hereon was 5.0% and 6.9%, respectively. Traction continues to hold a significant proportion of liquid funds and interest-bearing investments. This makes it possible to seize on interesting business opportunities that may arise in a turbulent market.

PERIOD APRIL - JUNE

Summary

The result amounted to MSEK –18 (162), of which from:

- Active holdings, listed MSEK –24 (9)
- Active holdings, unlisted MSEK –17 (142)

Transactions with closely related parties

No transactions between Traction have significantly affected the Group or the Parent Company's financial position during the period. There have been the usual transactions between companies in the Traction Group, including loans, interest payments, repayments and certain charges for services rendered.

Risker and uncertainty factors

The Group's and the Parent Company's significant risk and uncertainty factors include business risks in the form of exposure to certain industries, or an individual holding, as well as dependency on individual key persons in the Companies in which Traction is involved or has an ownership interest. In addition there are financial risks, which primarily consist of price risks, i.e. the risk of a change in value of a financial instrument due to changes in share prices, foreign exchange rates or interest rates. In addition to the risks described in

Traction's Annual Report in general by reason of the Company's business orientation, specific reference can be made to the Report of the Board of Directors and accompanying notes for a more detailed discussion of the Group's and the Parent Company's risk exposure and risk management procedures. Beyond that, no additional significant risks are deemed to have been added.

(The comparative data refer to the corresponding year-ago period with the exception of balance sheet and liquidity numbers which refer to year-end 2015.)

Valuation of financial instruments at level 3

Valuation of unlisted holdings is made on the basis of *International Private Equity and Venture Capital Valuation Guidelines* as developed and published jointly by risk capital organisations EVCA, BVCA and AFIC. For directly owned investments, an overall assessment is made to determine which valuation method is appropriate for each individual holding. Taken into account will be whether any financing or transaction "at arms-length distance" has been made and an evaluation is also made by applying relevant multiples to the company's key financial indicators from a selected group of similar companies, less an adjustment for, for instance, difference in size between the company in question and the group of comparable companies. In cases where there are other methods that better reflect the fair value of an individual holding, such methods are used which means that individual holdings may be value by other than the methods described above.

All level 3 assets consist of shares in unlisted companies and are valued in accordance with the following valuation methods and non-observable data used for determining the carrying value. The data in the table below represent a selection and is therefore not all input data used in the valuation.

EBIT multiples:	4 - 10
Revenue multiples:	0.5 – 3.0
Net asset valuation:	Established net asset value
Most recent transaction:	In the case of recently floated new issue/share offering, the price thereon is taken into account. Higher multiples may also be applied in cases of rapid growth.
